Student Management Platform

*"A Technology-based  
**Education System** bringing  
together **Students,**  
**Teachers** and **Employers**".*

[www.gibble.com.au](http://www.gibble.com.au)

- Course management
- Paperless Reporting
- Record Results
- Manage Students
- Record Attendance
- & much more...

# STUDENT MANAGEMENT SOFTWARE

Gibble manages your training organisation in a simple and efficient way. We empower educators with an effective learning solution for training and development. Gibble software has been approved by the biggest training organisations in Australia.

## Employer Portal

A portal for employers to access their student and/or apprentice's resources online.

## Responsive Design

Features a smooth and responsive web-based interface so the user can access the website using their desktop, tablet, or mobile.

## Paperless Reporting

Automatically generate reports in a PDF format, Email updates and reports, Save the document online & more.

## Manage Students

Manage and keep track of students with ease.

# GIBBLE & MOODLE

Moodle is your learning platform for schools and workplace training. Instructors and administrators can easily manage courses, student enrollments, files, assessments and much more!

Being a web-based learning management solution, users can access Moodle at any time and anywhere.

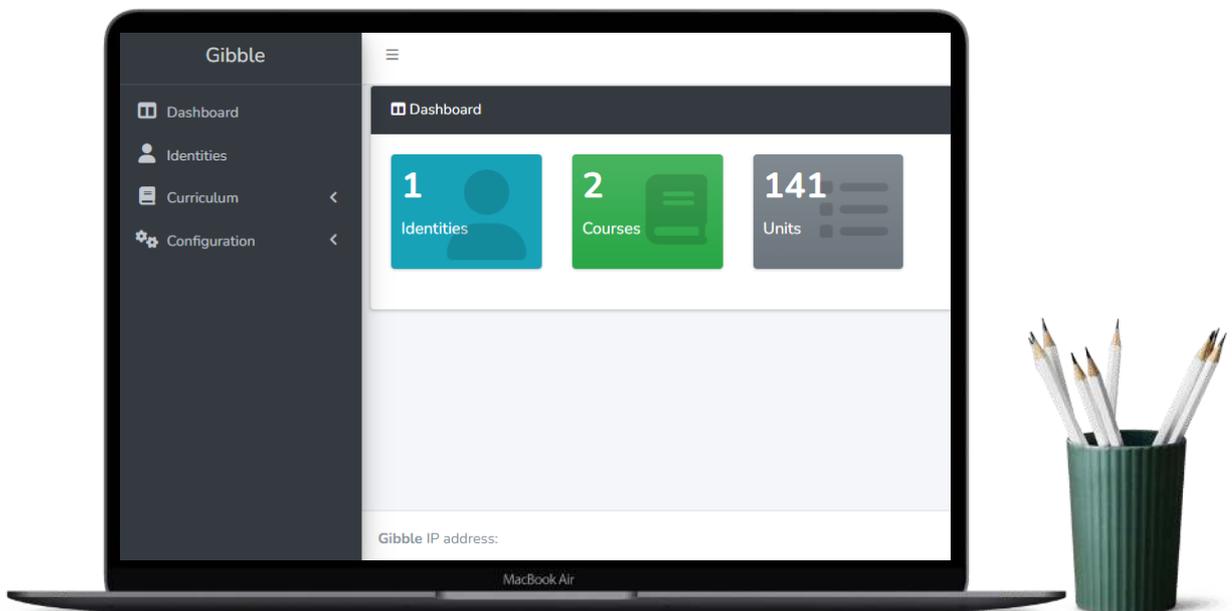

## Course Creation and management

Administrators can manage courses with ease using fully automated integrations into training.gov.au.

## Discussion Board

The discussion board is a great way for teachers and students to communicate and discuss topics about the course.

Our online student training tool is a user-friendly, web-based application customised to your specifications. Use GibbleSMS at any time, from any location. All you need is a Mobile Device or Desktop computer and access to the internet.

GibbleSMS is perfect for any size Training Organisation and supports apprenticeship and traineeship management with enhanced functionality.

## **GIBBLESMS FEATURES**

### **Course management**

Administrators can manage courses with ease using fully automated integrations into training.gov.au.

### **Competencies**

Competency-based learning is fully supported.

### **Levels and Clusters**

Manage student levels and unit clusters (Customisable for each institute)

### **Groups**

Keep track of reports in student groups.

### **Notes**

Keep an active list of student notes that are accessible throughout all the applications.

### **Report**

A complete pack of progress, attendance, and block reports customised for different employers and institutions.

### **Results**

Record student results. This includes but is not limited to results from the start and finish dates, RPL reporting, and Credit Transfers.

### **Generic Training Plans**

Users are able to generate their own generic training plans to suit particular streams and employers' requirements.

### **Attendance**

Student attendance can be recorded using lockstep, flexible delivery and scheduled unit models. Units taught are recorded for each student and an attended result can be recorded against those units in the students' training plan. Daily notes can be recorded which are linked to the employer's resources for review.

### **Enterprise Scheduling System**

GibbleSMS includes a full enterprise scheduling system for resources such as rooms and equipment. It even helps in scheduling teachers by tracking leave, teaching duties and training and assessment hours.

### **RPL**

Notes and information is stored inside the student's profile

### **Document Management**

A document management system designed to keep track of all student correspondence, training plans, etc and is automatically populated with reports when they are generated.

### **Record Cards**

A facility to automatically create customized record cards for students based on their current progress and competencies from their training plans.

### **Mentors**

Each student can be allocated a mentor (Teacher) that can run reports and manage their students.

### **Flexibility**

Result at your preferred level of detail, from high-level competencies to the lowest level of knowledge and practical components of the course.

## Employer Portal

A portal for employers to access their student and/or apprentice's resources online. This includes but is not limited to Attendance: Employers will be able to view the student's attendance and automatically be notified if they are absent via email or SMS.

Progress reports on demand: At any time an employer will be able to view live information on the students' progress and which competencies the student is currently working on.

Student assessment records signoff online: Which will also include email reminders of what items are still remaining for the employer to attend to.

# FEATURES

## Record Assessment Books Online

We have built generic templates which competency assessment record books can be set up. This will allow electronic availability and signoff.

These templates are available for institutes to start populating. This eliminates printing costs and has the ability to be produced on demand.

Sample questions and answers are available to be set up to assist trainers when doing on-site assessments.

## No More Rigid Desktop Applications

Gone are the days of slow and clunky desktop applications, GibbleSMS is a smooth and responsive web-based solution which is fully online so you aren't stuck in the past and can focus on what really matters.

## Complete Document Management

Manage and Track Student Results with ease using our Gibble system. Add notes, generate reports and more.

## Manage Student Enrolments

Manage the entire enrolment process from forms to processing, emails and letters, student ID and more.

- Complete Enrolment Forms
- Sign up Students on-site
- Enrolment Fees
- Employer Contracts
- Digital Signature
- Tick Sheet with core
- Competencies/streams and electives
- Avoid duplication

## Paperless Reporting

- Automatically generate reports in a PDF format
- Email updates and reports
- Save the document online
- Automatically or locally in user's computer
- Report straight to employers from the system
- Send attendance and progress reports directly to an employer from our system

## Integration

The Gibble application has direct links into systems such as Banner and QLS which retrieves read-only access to the following information. (Write access is available to be designed if required)

We are keen on having all the information in one place so there is no doubling up where possible. There have been audit tools created to identify if student results are entered directly into your internal SMS that has not passed through the Gibble to make sure both systems are up to date.

Once results are completed in the online learning portal, signed off on-site or manually put into the Gibble upload file processes directly into your internal SMS application. These are designed specifically to meet your SMS requirements.

## Secure

Our system utilises SSL encryption for our online services meaning your data is secure. Along with the SSL we also use up-to-date security practices to ensure the safety of our users.

## Link to [training.gov.au](https://training.gov.au)

Setting up Courses from [training.gov.au](https://training.gov.au) can be somewhat time-consuming. We have incorporated the available plugin into our Gibble applications to simplify this process by importing course setup information.

## Import Students

Moving to our system can be a breeze with our bulk import tools. GibbleSMS supports the bulk importation of Delta and various other SMS (Banner, QLS, TEAMS) data meaning minimal effort to switch to our advanced system. We also are happy to work with you to import any sort of existing data structure that you might already have so that you get the data you need in the system you use.

## Training Plan Management

Lead the entire training plan creation process

- Allows generic training plan usage
- Allows changing the competency levels
- Training plan validation package rules

## Moodle Result Automatic Extracting System

**The Problem:** Many systems have been designed to run side by side with Moodle. A manual process is required to transfer the information from Moodle into a Student Management System via reporting or manually logging into each system and synchronising the results.

**Our Solution:** We have designed our system so that it integrates directly with your Moodle to automatically transfer the results from the online learning platform into your SMS.

# GIBBLE AND MOODLE

Gibble has built its reputation by partnering with many clients in the corporate, government and education sectors. Gibble uses Moodle, an online learning training platform that is user-friendly and a web-based application. We customise Moodle to your company specifications.

## MOODLE FEATURES

**All-in-one Calendar**

**Course Creation & Management**

**Online Assessments**

**Site Design and Layout**

**Regular Security Updates**

**Personalised Dashboard**

**Notifications & Automatic Alerts**

**Discussion Board**

**File Management**

**Assessment Feedback**

**Embed External Resources**

## SERVICES

### Consulting

Let's meet up and discuss your requirements. We analyse your needs so you can make an informed decision early.

### Design

We can help you with a custom-designed Moodle website that's suited to your brand.

### Development

Let us know what custom features you need on your Moodle site so we can accommodate your unique requirements.

### Managed Hosting

Depending on your requirements, we will make an assessment on what type of hosting you require.

### Training

We provide training to staff and show you all of the important settings you will need to know as an administrator.

### Support

We have a friendly support team who can answer your Moodle questions.

## FAQ

### **Where are your servers located?**

Our servers are located in Port Melbourne.

### **Can I have a demo?**

Yes, we offer one month free trial. We can also walk you through a guided demo.

To get started please contact us on 03 9744 2887 or email [info@gici.com.au](mailto:info@gici.com.au).

### **Do you hire offshore developers?**

No, we have our own team of highly skilled engineers based right in Melbourne.
